Subject index

Acetonitrile
Electrochemical behaviour of furan, 2-methylfuran and 2,5-dimethylfuran in acetonitrile (Nessakh et al.) 263
Adatoms
On the surface coverage with adatoms during the initial nucleation stages of nickel deposition onto glassy carbon (Bozhkov et al.) 453
Alamethicin
Analysis of the alamethicin induced single channel conductance fluctuations in lipid bilayers as a birth and death process (Clessienne et al.) 429
Alkylammonium ions
Ac polarogaphic determination of the rate of ion transfer for a series of alkylammonium ions at the nitrobenzene/water interface (Kakiuchi et al.) 517
Ammonium fluoride
Oxidation of 2,5-dimethylaniline in NH_4F·2.35 HF medium. Characteristics of the resulting conducting polymer (Geniès, Noël) 473
Ammonium tetrasulphide
Electrochemical studies of ammonium tetrasulphide in solution in liquid ammonia (Jehoulet et al.) 77
Anthraquinone
Electrochemistry in hydrophobic Nafion gels. Part 2. Electrochemical behaviour and catalytic properties of electrodes modified by hydrophobic Nafion gels loaded with 9-phenylacridinium salts and anthraquinone (Andrieux et al.) 129
Arylhydroxylamines
Reaction of electrogenerated arylhydroxylamines and nitrosobenzene in the course of reduction of nitrobenzene under conditions of cyclic voltammetry (Zuman, Fijalek) 589
Association/dissociation kinetics
Voltammetry of heterogeneous metal complex systems. Theoretical analysis of the effects of association/dissociation kinetics and the ensuing lability criteria (Van Leeuwen, Buffle) 359

Benzotriazole
Electrochemical behavior of copper in deaerated 1.0 M HCl solutions in the absence and presence of Fe(III) and benzotriazole (BTAH) (Da Costa, Agostinho) 51
Bipolarity
Characterization of a bipolaronic form in poly(2-methylaniline) (Leclerc) 93

Calorimetry
Electrochemical calorimetric evidence for cold fusion in the palladium–deuterium system (Miles et al.) 241
Carbon monoxide
Electorchemical studies in sulphuric acid solutions of adsorbed CO on Pt(111) electrodes (Feliu et al.) 191
Chlorination
The role of water in the electrochemical chlorination of cycloolefins in nitromethane solution (Visy, Novák) 571
Chlorodimethyl sulphoxide ruthenium(III) complexes
Electrochemistry of sodium *trans*-bis(dimethyl sulphoxide)tetrachlororuthenate(III) and *mer*-trichlorotris(dimethyl sulphoxide)ruthenium(III): the first and complete electrochemical characterization of chlorodimethyl sulphoxide ruthenium(III) complexes (Costa et al.) 57
Close electrochemical processes
Detection and resolution enhancement of two close electrochemical processes (Pežeta et al.) 395
Cold fusion
Electrochemical calorimetric evidence for cold

fusion in the palladium–deuterium system (Miles et al.) 241

Conductance
Analysis of the alamethicin induced single channel conductance fluctuations in lipid bilayers as a birth and death process (Clessienne et al.) 429

Conducting polymers
Oxidation of 2,5-dimethylaniline in $NH_4F \cdot 2.35$ HF medium. Characteristics of the resulting conducting polymer (Geniès, Noël) 473

Copper
Electrochemical behavior of copper in deaerated 1.0 M HCl solutions in the absence and presence of Fe(III) and benzotriazole (BTAH) (Da Costa, Agostinho) 51

Cyanide
Electrochemistry of the nickel-cyanide system at mercury electrodes. Part VI. On the decrease in the $Ni(CN)_4^{2-}$ electroreduction wave caused by repulsive double-layer effects (Orlik, Galus) 101

Cyclic voltammetry
Digital simulation of the square scheme in cyclic voltammetry. A comparison of methods (Lerke et al.) 299
Is cyclic voltammetry above a few hundred kilovolts per second still cyclic voltammetry? (Amatore, Lefrou) 335

Cycloolefins
The role of water in the electrochemical chlorination of cycloolefins in nitromethane solution (Visy, Novák) 571

Density of states
On the possibility of measuring the adsorbate density of states with a scanning tunneling microscope (Schmickler) 283

Deuterium
Electrochemical calorimetric evidence for cold fusion in the palladium–deuterium system (Miles et al.) 241
Measurement of absorption of hydrogen and deuterium into palladium during electrolysis by a quartz crystal microbalance (Gräsjo, Seo) 233

Diffusion
Steady-state multicomponent diffusion and migration to a planar electrode. Part 1. Analytical solution for the case of a single reacting species (Pritzker) 1

Digital simulation
Digital simulation of the square scheme in cyclic voltammetry. A comparison of methods (Lerke et al.) 299

Dimethylaniline
Oxidation of 2,5-dimethylaniline in $NH_4F \cdot 2.35$ HF medium. Characteristics of the resulting conducting polymer (Geniès, Noël) 473

Disc microelectrodes
The steady, diffusion-limited current at a disc microelectrode with a first-order EC′ reaction (Phillips) 255

EC′ reaction
The steady, diffusion-limited current at a disc microelectrode with a first-order EC′ reaction (Phillips) 255

Elimination polarography
Theory of irreversible currents in elimination polarography (Dračka) 405

Ethylene glycol
The properties of palladium electrodes for electrooxidation of ethylene glycol (Dalbay, Kadırgan) 559

Ferri/ferrocyanide
Fundamental analysis on a thermocell with a mixture of the soluble redox couple aqueous potassium ferrocyanide and potassium ferricyanide solution (Ikeshoji, Bravo de Nahui) 19

Ferrocenes
Electrochemistry in hydrophobic Nafion gels. Part 1. Electrochemical behaviour of electrodes modified by hydrophobic Nafion gels loaded with ferrocenes (Andrieux et al.) 117

Fluctuation analysis
Fluctuation analysis at ITIES (Mareček et al.) 537

Fourier transform
The Fourier transform of a voltammetric peak and its use in resolution enhancement (Engblom) 371

Furan
Electrochemical behaviour of furan, 2-methylfuran and 2,5-dimethylfuran in acetonitrile (Nessakh et al.) 263

Glassy carbon
On the surface coverage with adatoms during the initial nucleation stages of nickel deposition onto glassy carbon (Bozhkov et al.) 453

Gold
Adsorption of pyridine at the Au(110)–solution interface (Stolberg et al.) 171

Heterogeneous metal complex systems
Voltammetry of heterogeneous metal complex systems. Theoretical analysis of the effects of association/dissociation kinetics and the ensuing lability criteria (Van Leeuwen, Buffle) 359
High scan rates
Is cyclic voltammetry above a few hundred kilovolts per second still cyclic voltammetry? (Amatore, Lefrou) 335
Hydrogen
Measurement of absorption of hydrogen and deuterium into palladium during electrolysis by a quartz crystal microbalance (Gräsjo, Seo) 233
Hydrogen fluoride
Oxidation of 2,5-dimethylaniline in $NH_4F \cdot 2.35$ HF medium. Characteristics of the resulting conducting polymer (Geniès, Noël) 473
Hydroquinone
Molecular orientation of hydroquinone on smooth platinum electrodes studied by radioactive labeling (Krauskopf, Wieckowski) 159

Interfaces between two immiscible electrolyte solutions
Fluctuation analysis at ITIES (Mareček et al.) 537
Voltammetry at microITIES supported at the tip of a micropipette. Part I. Linear sweep voltammetry (Stewart et al.) 491
Ion transfer
Ac polarographic determination of the rate of ion transfer for a series of alkylammonium ions at the nitrobenzene/water interface (Kakiuchi et al.) 517
Ion transport
Electrochemical transport of organic ions through polyvinylchloride (Miller, Lynch) 141
Iridium
Probe beam deflection investigation of the charge storage reaction in anodic iridium and tungsten oxide films (Kötz et al.) 37
Iron
Electrochemical behavior of copper in deaerated 1.0 M HCl solutions in the absence and presence of Fe(III) and benzotriazole (BTAH) (Da Costa, Agostinho) 51
Irreversible currents
Theory of irreversible currents in elimination polarography (Dračka) 405

Lability criteria
Voltammetry of heterogeneous metal complex systems. Theoretical analysis of the effects of association/dissociation kinetics and the ensuing lability criteria (Van Leeuwen, Buffle) 359
Linear sweep voltammetry
Voltammetry at microITIES supported at the tip of a micropipette. Part I. Linear sweep voltammetry (Stewart et al.) 491
Lipid bilayers
Analysis of the alamethicin induced single channel conductance fluctuations in lipid bilayers as a birth and death process (Clessienne et al.) 429
Lipophile exchange membranes
Lipophile exchange membranes as electroactive assemblies on electrode surfaces (Kasem et al.) 221

Membranes
Direct observation of ion behaviour in a membrane containing valinomycin (Fujiwara) 259
Lipophile exchange membranes as electroactive assemblies on electrode surfaces (Kasem et al.) 221
Mercury
A comparative study of the kinetics of formation of condensed monolayers of uracil and uridine at the mercury/water interface (François et al.) 415
Electrochemistry of the nickel-cyanide system at mercury electrodes. Part VI. On the decrease in the $Ni(CN)_4^{2-}$ electroreduction wave caused by repulsive double-layer effects (Orlik, Galus) 101
Metal complex systems
Voltammetry of heterogeneous metal complex systems. Theoretical analysis of the effects of association/dissociation kinetics and the ensuing lability criteria (Van Leeuwen, Buffle) 359
Metal/electrolyte interface
Two-dimensional nucleation in the adsorp-

tion at the metal/electrolyte interface (Retter) 445

Microelectrodes

The steady, diffusion-limited current at a disc microelectrode with a first-order EC′ reaction (Phillips) 255

A survey of steady-state microelectrodes and experimental approaches to a voltammetric steady state (Zoski) 317

Micropipette

Voltammetry at microITIES supported at the tip of a micropipette. Part I. Linear sweep voltammetry (Stewart et al.) 491

Molar dynamics simulation

A molar dynamics simulation of electrified platinum/water interfaces (Nagy, Heinzinger) 549

Molecular orientation

Molecular orientation of hydroquinone on smooth platinum electrodes studied by radioactive labeling (Krauskopf, Wieckowski) 159

Monolayers

A comparative study of the kinetics of formation of condensed monolayers of uracil and uridine at the mercury/water interface (François et al.) 415

Multicomponent diffusion

Steady-state multicomponent diffusion and migration to a planar electrode. Part 1. Analytical solution for the case of a single reacting species (Pritzker) 1

Nafion

Electrochemistry in hydrophobic Nafion gels. Part 1. Electrochemical behaviour of electrodes modified by hydrophobic Nafion gels loaded with ferrocenes (Andrieux et al.) 117

Electrochemistry in hydrophobic Nafion gels. Part 2. Electrochemical behaviour and catalytic properties of electrodes modified by hydrophobic Nafion gels loaded with 9-phenylacridinium salts and anthraquinone (Andrieux et al.) 129

Nickel

Electrochemistry of the nickel-cyanide system at mercury electrodes. Part VI. On the decrease in the $Ni(CN)_4^{2-}$ electroreduction wave caused by repulsive double-layer effects (Orlik, Galus) 101

On the surface coverage with adatoms during the initial nucleation stages of nickel deposition onto glassy carbon (Bozhkov et al.) 453

Nitrobenzene

Ac polarographic determination of the rate of ion transfer for a series of alkylammonium ions at the nitrobenzene/water interface (Kakiuchi et al.) 517

Contribution to the understanding of the reduction mechanism of nitrobenzene (Zuman, Fijalek) 583

Reaction of electrogenerated arylhydroxylamines and nitrosobenzene in the course of reduction of nitrobenzene under conditions of cyclic voltammetry (Zuman, Fijalek) 589

Nitromethane

The role of water in the electrochemical chlorination of cycloolefins in nitromethane solution (Visy, Novák) 571

Nitrosobenzene

Reaction of electrogenerated arylhydroxylamines and nitrosobenzene in the course of reduction of nitrobenzene under conditions of cyclic voltammetry (Zuman, Fijalek) 589

Non-linear optical techniques

Comparative studies of the Ag/aqueous electrolyte interface by photoacoustic and nonlinear optical techniques (Chu, Richmond) 203

Nucleation

On the surface coverage with adatoms during the initial nucleation stages of nickel deposition onto glassy carbon (Bozhkov et al.) 453

Two-dimensional nucleation in the adsorption at the metal/electrolyte interface (Retter) 445

Optical techniques

Comparative studies of the Ag/aqueous electrolyte interface by photoacoustic and nonlinear optical techniques (Chu, Richmond) 203

Organic ions

Electrochemical transport of organic ions through polyvinylchloride (Miller, Lynch) 141

Oxometalates

Probing the distribution of peroxy species derived from oxometalates by electrochemistry and spectroscopy (Keita et al.) 275

Palladium

Electrochemical calorimetric evidence for cold fusion in the palladium–deuterium system (Miles et al.) 241

In situ electrochemical quartz crystal microbalance studies of water electrolysis at a palladium cathode in acidic aqueous media (Yamamoto et al.) 463
Measurement of absorption of hydrogen and deuterium into palladium during electrolysis by a quartz crystal microbalance (Gräsjo, Seo) 233
The properties of palladium electrodes for electrooxidation of ethylene glycol (Dalbay, Kadırgan) 559

Peroxy species
Probing the distribution of peroxy species derived from oxometalates by electrochemistry and spectroscopy (Keita et al.) 275

Phenylacridinium
Electrochemistry in hydrophobic Nafion gels. Part 2. Electrochemical behaviour and catalytic properties of electrodes modified by hydrophobic Nafion gels loaded with 9-phenylacridinium salts and anthraquinone (Andrieux et al.) 129

Photoacoustic techniques
Comparative studies of the Ag/aqueous electrolyte interface by photoacoustic and nonlinear optical techniques (Chu, Richmond) 203

Planar electrodes
Steady-state multicomponent diffusion and migration to a planar electrode. Part 1. Analytical solution for the case of a single reacting species (Pritzker) 1

Platinum
A molar dynamics simulation of electrified platinum/water interfaces
(Nagy, Heinzinger) 549
Molecular orientation of hydroquinone on smooth platinum electrodes studied by radioactive labeling (Krauskopf, Wieckowski) 159
Electrochemical studies in sulphuric acid solutions of adsorbed CO on Pt(111) electrodes (Feliu et al.) 191

Polarography
The origin of polarography (Koryta) 293

Poly(2-methylaniline)
Characterization of a bipolaronic form in poly(2-methylaniline) (Leclerc) 93

Polypyrrole
Observation of soluble electroactive intermediates during the anodic formation of conducting polypyrrole films (Raymond, Harrison) 269

Polyvinylchloride
Electrochemical transport of organic ions through polyvinylchloride (Miller, Lynch) 141

Potassium ferri/ferrocyanide
Fundamental analysis on a thermocell with a mixture of the soluble redox couple aqueous potassium ferrocyanide and potassium ferricyanide solution (Ikeshoji, Bravo de Nahui) 19

Probe beam deflection
Probe beam deflection investigation of the charge storage reaction in anodic iridium and tungsten oxide films (Kötz et al.) 37

Pyridine
Adsorption of pyridine at the Au(110)–solution interface (Stolberg et al.) 171

Quartz crystal microbalance
In situ electrochemical quartz crystal microbalance studies of water electrolysis at a palladium cathode in acidic aqueous media (Yamamoto et al.) 463
Measurement of absorption of hydrogen and deuterium into palladium during electrolysis by a quartz crystal microbalance (Gräsjo, Seo) 233

Radioactive labeling
Molecular orientation of hydroquinone on smooth platinum electrodes studied by radioactive labeling (Krauskopf, Wieckowski) 159

Resolution enhancement
Detection and resolution enhancement of two close electrochemical processes (Peżeta et al.) 395
The Fourier transform of a voltammetric peak and its use in resolution enhancement (Engblom) 371

Ruthenium
Electrochemistry of sodium *trans*-bis(dimethyl sulphoxide)tetrachlororuthenate(III) and *mer*-trichlorotris(dimethyl sulphoxide) ruthenium(III): the first and complete electrochemical characterization of chlorodimethyl sulphoxide ruthenium(III) complexes (Costa et al.) 57

Scan rates
Is cyclic voltammetry above a few hundred kilovolts per second still cyclic voltammetry? (Amatore, Lefrou) 335

Scanning tunneling microscope
On the possibility of measuring the adsorbate density of states with a scanning tunneling microscope (Schmickler) 283
Silver
Comparative studies of the Ag/aqueous electrolyte interface by photoacoustic and nonlinear optical techniques (Chu, Richmond) 203
Sodium *trans*-bis(dimethyl sulphoxide)tetrachlororuthenate(III)
Electrochemistry of sodium *trans*-bis(dimethyl sulphoxide)tetrachlororuthenate(III) and *mer*-trichlorotris(dimethyl sulphoxide) ruthenium(III): the first and complete electrochemical characterization of chlorodimethyl sulphoxide ruthenium(III) complexes (Costa et al.) 57
Soluble electroactive intermediates
Observation of soluble electroactive intermediates during the anodic formation of conducting polypyrrole films (Raymond, Harrison) 269
Square scheme
Digital simulation of the square scheme in cyclic voltammetry. A comparison of methods (Lerke et al.) 299
Steady-state microelectrodes
A survey of steady-state microelectrodes and experimental approaches to a voltammetric steady state (Zoski) 317
Sulphur
Electrochemical studies of ammonium tetrasulphide in solution in liquid ammonia (Jehoulet et al.) 77
Sulphuric acid
Electrochemical studies in sulphuric acid solutions of adsorbed CO on Pt(111) electrodes (Feliu et al.) 191

Thermocell
Fundamental analysis on a thermocell with a mixture of the soluble redox couple aqueous potassium ferrocyanide and potassium ferricyanide solution (Ikeshoji, Bravo de Nahui) 19
Trichlorotris(dimethyl sulphoxide)ruthenium(III)
Electrochemistry of sodium *trans*-bis(dimethyl sulphoxide)tetrachlororuthenate(III) and *mer*-trichlorotris(dimethyl sulphoxide) ruthenium(III): the first and complete electrochemical characterization of chlorodimethyl sulphoxide ruthenium(III) complexes (Costa et al.) 57
Tungsten
Probe beam deflection investigation of the charge storage reaction in anodic iridium and tungsten oxide films (Kötz et al.) 37
Two-dimensional nucleation
Two-dimensional nucleation in the adsorption at the metal/electrolyte interface (Retter) 445

Uracil
A comparative study of the kinetic of formation of condensed monolayers of uracil and uridine at the mercury/water interface (François et al.) 415
Uridine
A comparative study of the kinetics of formation of condensed monolayers of uracil and uridine at the mercury/water interface (François et al.) 415

Valinomycin
Direct observation of ion behaviour in a membrane containing valinomycin (Fujiwara) 259
Voltammetric peaks
The Fourier transform of a voltammetric peak and its use in resolution enhancement (Engblom) 371

Water
Ac polarographic determination of the rate of ion transfer for a series of alkylammonium ions at the nitrobenzene/water interface (Kakiuchi et al.) 517
A molar dynamics simulation of electrified platinum/water interfaces
(Nagy, Heinzinger) 549
The role of water in the electrochemical chlorination of cycloolefins in nitromethane solution (Visy, Novák) 571
Water electrolysis
In situ electrochemical quartz crystal microbalance studies of water electrolysis at a palladium cathode in acidic aqueous media (Yamamoto et al.) 463
